

#SAFERHOMES

**AN INTERNET SAFETY FRAMEWORK
FOR SCHOOLS AND FAMILIES**

BACK TO SCHOOL 2020-2021

*Is your district ready to **protect kids online** **and make families ready** for digital risk during the 2020-2021 school year?*

**Virtual school is here to stay.
So, Protect Young Eyes created
#SAFERHOMES.**

**A unique framework for both schools
and parents that provides a safer and
more productive digital experience in
2020-2021.**

(FOR DISTRICTS)

See parents as partners.
Always own incidents.
Fund digital citizenship.
Educate families.
Recommend great tools.

(FOR FAMILIES)

Hug your router.
Own the Chromebook!
Manage the Toxic Trio.
Evade distraction.
Stay current on trends.

(FOR DISTRICTS)

See parents as partners.

Always ask, "How does this decision impact our families?"
Example - Teachers might understand Google Classroom, but what about your parents? How can the District help them? Are parents told how much digital work to expect each day?

Always own incidents.

Does someone own incidents that occur on the school's network? Does a policy exist so that incidents are handled consistently? Do parents know the process? Each of these questions should have a clearly communicated answer.

Fund digital citizenship.

Does curriculum encourage students to explore what's POSSIBLE with technology instead of a list of do's and don'ts? Is the school helping students become empathetic, thoughtful, and critical digital thinkers? The Every School EdTech Triangle should be considered by every district.

Educate families.

Is there a plan for keeping families current on digital trends in the absence of in-person gatherings? Consider PYE's free weekly webinars. Or the Protect app.

Recommend great tools.

Does the District's website tell parents how to manage devices at home, filter out the junk, and have great conversations? Just point them to protectyoungeyes.com. We'll take care of it.

(FOR FAMILIES)

Hug your router.

The router is the most important digital device in the home! Maybe it's time for a Gryphon (PYE recommendation). The right router minimizes or eliminates many digital disasters.

Own the Chromebook!

Whether it's school-issued or yours, it's time to "own" how the Chromebook works. Do you understand Family Link, admin. rights, and guest access? The PYE Chromebook parental controls guide explains each of these steps.

Manage the Toxic Trio.

Bedrooms + Boredom + Darkness + WiFi = trouble for many young people (and adults). Families should be hyperaware of these risks and manage them. PYE can help.

Evade distraction.

Do you have a plan for keeping kids more focused while doing more virtual school work? The Team at Better Screen Time has created an amazing guide to help students stay on task.

Stay current on trends.

Text PROTECT to 66866 for the weekly PYE newsletter. Be notified when we release the Protect App. The very first bilingual digital safety app. Optional faith-base, too. Let Protect Young Eyes do the heavy lifting.

BACK TO SCHOOL 2020-2021

We believe that districts and families that do the things shown on the previous pages will have kids who have a safer and more productive digital experience during the 2020-2021 school year.

If you want help with any of these steps, please contact us at:

chrism@protectyouneyes.com

BACK TO SCHOOL 2020-2021

COVID-19 robbed us of our ability to speak with students, parents, and teachers about technology in large groups.

So, we built **THE PROTECT APP.**

This unique tool uses bite-sized, micro lessons to break down complex issues. It will help families become predator-proof, porn-resilient, and screen wise.

Schools can be heroic by purchasing access to the app for all of their families.

Email chrism@protectyouneyes.com for details!
